

# Sand

## COMMON CROP TYPES

Carrots, radishes, potatoes, tomatoes, corn, lettuce, maize, barley

**Herbs:** rosemary, and thyme

**Fruits:** such as melon, and watermelon.

**Flowers:** tulips, roses, and hibiscus.

## Definition

Sandy soils contain the highest portion of sand, with low levels of silt and clay.

## Composition

Clay (<1%), silt (<2%), and sand (98%).

## Characteristics

Sandy soils are characterized by grain sizes of 0.05-2mm, low fertility, and fast drainage rates.
